Louis Chartier

Full Stack Developer | Frontend Specialist
Montreal, QC | (514) 966-7269 | lchartier2002@gmail.com | linkedin.com/in/louis-chartier-dev | github.com/louis-tm

PROFESSIONAL SUMMARY

Full Stack Developer with a strong frontend focus and a track record of delivering production-grade web applications, including a deployed CRM-based event planning platform built with React, Spring Boot, and PostgreSQL. Owns projects end-to-end, from requirements and database design through deployment and iteration, while managing client relationships and architectural decisions independently. Bilingual (EN/FR), detail-oriented, and experienced with AI-assisted development workflows. Actively seeking frontend, full stack, or software development roles.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript ES6+, Python, Java, PHP, SQL, C#, .NET
Frontend: React, Angular, jQuery, Bootstrap, Tailwind CSS, SCSS/SASS, FXML, Responsive Design
Backend & APIs: Spring Boot, Node.js, Python APIs, RESTful APIs, JWT, Spring Security, Axios, Fetch, JSON, MySQL, PostgreSQL
Dev Tools: Git, GitHub, VS Code, IntelliJ IDEA, Postman, pgAdmin, Cursor AI, Railway, npm
Design & Process: Figma, Adobe XD, Adobe Creative Cloud, Trello, Agile/Scrum, MVC, Client Communication, UI/UX

WORK EXPERIENCE

Full Stack Developer | Events by Paige Ligris Jan 2026 – Present
Sole developer on a CRM and event-planning platform for a live business, taking it from the first requirements conversation to production on Railway with a custom domain. Designed a normalized 15-table PostgreSQL schema around events, clients, vendors, and inventory, then built the Spring Boot REST API on top of it, secured with JWT, Spring Security, role-based access control, and BCrypt hashing. On the React front end, delivered full CRUD across six modules with search, filtering, and CSV/PDF export (jsPDF, PapaParse), plus a Recharts dashboard giving the owner live views of revenue trends, task priority, and lead pipeline. Added a CRM layer tracking client and vendor history and business analytics. Validated endpoints in Postman, verified data integrity in pgAdmin, and walked the owner through each release, using Cursor AI to ship faster while keeping architecture decisions in-house.

Warehouse Operations Associate | Matrox Video May 2022 – Aug 2023
Managed parts fulfillment and cycle audits, reconciled shipments against system records, and coordinated with production teams to prioritize orders, keeping inventory data accurate across locations.

PROJECTS

Movie Explorer | React, REST API, Tailwind CSS, React Router (2025)
Movie discovery app consuming the TMDB API with async fetching, error handling, pagination, and dynamic routing. Fully responsive; passed Lighthouse accessibility and performance audits; deployed on GitHub.

Realtor Property Listing Platform | PHP, MySQL, MVC (2025)
Full-stack listing platform with CRUD operations, server-side validation, and an admin panel. Applied MVC to separate business logic, data access, and presentation; mobile-first responsive frontend.

EDUCATION

AEC, Full Stack Developer | John Abbott College, Montreal QC (2024 – 2026)
Web App Development, Database Design & SQL, OOP (Java), RESTful API Development, UI/UX & Responsive Design, Agile/Scrum, Git/GitHub, PHP, JavaScript ES6+, React, MVC, Security & Authentication

Certificate, Graphic Design | Concordia University, Montreal QC (2022 – 2024)
