

Louis Chartier

Full Stack Developer | Frontend Specialist

Montreal, QC | (514) 966-7269 | lchartier2002@gmail.com | linkedin.com/in/louis-chartier-dev | github.com/louis-tm

PROFESSIONAL SUMMARY

Full Stack Developer with a strong frontend focus and a proven track record of delivering production-grade web applications that solve real business problems. Experienced architecting and shipping complete systems using React, Spring Boot, PostgreSQL, and REST APIs including a deployed CRM-based event planning platform built and maintained in a professional setting. Adept at taking full ownership of projects from requirements gathering and database design through to deployment and ongoing iteration. Comfortable working independently, managing client relationships, and making architectural decisions without oversight. Bilingual (EN/FR), detail-oriented, and skilled at leveraging modern AI-assisted development workflows to deliver higher quality software faster. Actively seeking frontend, full stack, or software development roles where I can build things that matter.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript ES6+, Java, PHP, SQL, C#

Frontend: React, jQuery, Bootstrap, Tailwind CSS, SCSS/SASS, FXML

Backend & APIs: Spring Boot, Node.js, RESTful APIs, Fetch, Axios, JSON, PHP, MySQL, PostgreSQL

Dev Tools: Git, GitHub, VS Code, IntelliJ IDEA, Postman, pgAdmin, Cursor AI, Figma, npm

Design Tools: Adobe XD, Adobe Creative Cloud, Figma, Trello

Soft Skills: Agile/Scrum, Client Communication, Independent Problem Solving, UI/UX Sensibility

WORK EXPERIENCE

Full Stack Developer — Events by Paige Ligris

Jan 2026 – Present

- Architected and delivered a production-grade full-stack event planning management system using React, Spring Boot, and PostgreSQL deployed on Railway with a custom domain
- Designed a normalized relational database schema with 8 tables handling complex many-to-many relationships between events, clients, vendors, contacts, and inventory
- Built a secure REST API with JWT-based authentication and Spring Security all routes protected with role-based access control and BCrypt password hashing
- Developed a CRM layer on top of the management platform tracking full client and vendor relationship history, lead pipelines, booking frequency, and long-term business analytics
- Engineered a real-time dashboard with Recharts visualizations including event status breakdowns, task priority analytics, revenue trends, and automated overdue/low-stock alerts
- Implemented full CRUD across 6 core modules with search, filtering, color-coded status badges, delete confirmation, notes panels, and an event timeline view
- Built CSV and PDF export functionality across all data modules using jsPDF and PapaParse enabling the business owner to generate reports on demand
- Integrated automated task due-date alerts and a CRM-style follow-up reminder system to proactively surface high-priority actions
- Tested all API endpoints with Postman, validated database integrity with pgAdmin, and conducted regular end-to-end walkthroughs with the business owner
- Leveraged Cursor AI to accelerate delivery while maintaining full architectural ownership a workflow consistent with modern professional development standards
- Sole developer on the project managed full product lifecycle from requirements gathering and database design through to production deployment and ongoing iteration

Warehouse Operations Associate — Matrox Video

May 2022 – Aug 2023

- Managed parts fulfillment for internal production teams and performed regular cycle audits to maintain stock accuracy and identify discrepancies across warehouse locations
- Analyzed incoming shipments and reconciled physical stock against system records to ensure data integrity across inventory tracking systems
- Coordinated with cross-functional production teams to prioritize order fulfillment based on operational demand and production schedules

PROJECTS

Movie Explorer — React / REST API / Tailwind CSS

2025

- Built a movie discovery app consuming the TMDb REST API with async data fetching, error handling, pagination, and dynamic routing via React Router
- Fully responsive multi-component architecture; passed Lighthouse accessibility and performance audits; deployed on GitHub with documentation

Realtor Property Listing Platform — PHP / MySQL / MVC

2025

- Full-stack property listing platform with PHP backend, MySQL database, CRUD operations, server-side validation, and an admin management panel
- Applied MVC design patterns to cleanly separate business logic, data access, and presentation layers; mobile-first responsive frontend

EDUCATION

AEC — Full Stack Developer — John Abbott College, Montreal QC

2024 – 2026

Coursework: Web Application Development, Database Design & SQL, Object-Oriented Programming (Java), RESTful API Development, UI/UX Principles & Responsive Design, Agile/Scrum Methodology, Version Control (Git/GitHub), PHP Backend Development, JavaScript ES6+, React Frontend Development, MVC Architecture, Security & Authentication

Certificate — Graphic Design — Concordia University, Montreal QC

2022 – 2024

Visual communication, typography, brand identity, digital illustration, Adobe CC, and Figma
